

# SALIENT

Safer, Lighter, Circular, Smarter

## Changing the future of FES design & vehicle safety!

### SALIENT Revolutionises the Automotive Sector

SALIENT is a EU-funded Research & Innovation Action (RIA) developing a future-proof lightweight Front-End Structure (FES) design for the automotive industry. It aims to increase crash safety by addressing new mixed traffic scenarios and updated vehicle fleet characteristics.

#### Safer

New vehicle designs, innovative use of energy absorbing materials.

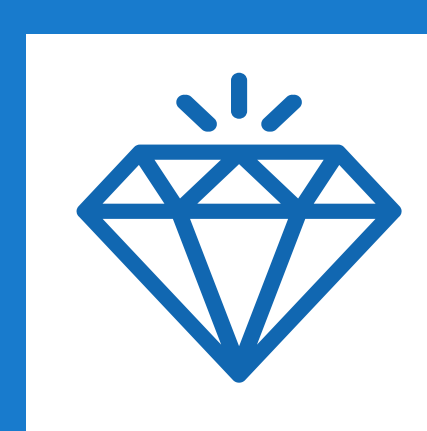

#### Circular

Application of eco-design for economic & environmental sustainability.

#### Lighter

Use of advanced light materials, adaptable to different crash configurations.

#### Smarter

Optimised design of crash box to minimise impact in vehicle crashes.

Funded by the European Union

UK Research and Innovation
